

WORLD HAPPENINGS  
BRIEFLY TOLD

The new German dirigible, LZ-127, may make a trip to East Asia by way of California.

Miss Mercedes Gifford, London stenographer, failed in an attempt to swim the Irish Channel to Great Britain.

Assurance that representations made on behalf of the blind in Canada will receive government consideration has been given to a delegation of blind persons by Hon. J. A. Robb, Minister of Finance.

The King has approved the appointment of Sir John Middleton as Governor-General and Commander-in-Chief of Newfoundland, in succession to Sir William Allarday, whose term has expired.

The University of Wisconsin, at Madison, gave recognition to the attainments of its most celebrated former student, Col. Charles A. Lindbergh, by conferring the honorary degree of Doctor of Laws. Lindbergh arrived there by plane.

Fritz Von Opel's rocket car, the Rak-3, was wrecked, but not until it had attained a speed of 138 miles an hour. This is claimed as a world record on rails. There was no driver in the car.

England's most picturesque visitor, Sir Offi Atta, "black-potential" of Akim Abukawa, has received from the King at Buckingham Palace the accolade of his new British knighthood.

Col. Charles A. Lindbergh carries a blanket public liability aviation insurance policy to the amount of \$100,000 on any aircraft piloted by him. The policy also covers him for property damage.

Fur-bearing animals in Ontario are growing scarcer each year, as frontiers of civilization move forward. It is indicated in a statement issued by the Department of Fish and Game, which shows that royalties received last year totalled \$12,762, compared with \$130,793 in 1926. With the trapping of beaver eliminated the amount is likely to be still smaller for 1928.

## How Far Voice Will Carry

Depends On Atmosphere, Wind and Competing Noises

The distance to which a man's voice will carry depends upon many different circumstances. The condition of the atmosphere is one—damp will slow down the sound-waves, while a dry, crisp air will forward them easily. Wind is another factor—so is the height of the speaker in regard to the number of objects, rocks and so on in front of him. The number of competing noises also has to be considered. Under ordinary circumstances, few voices will carry intelligibly much over a couple of hundred yards, but this distance has been far exceeded with exceptionally favorable conditions. In the stillness of the frozen North, for instance, a voice will carry for over a mile. And a song, as rendered from a mountain top, was once heard at a distance of four miles.

## Question Of Relationship

In a recent court case at Toronto, a nice question in relationship was propounded. The plaintiff, a woman, was testifying against a chauffeur. "Isn't he your brother-in-law?" she was asked by counsel. "Didn't you say he was?" "No, I said he was my husband's sister's husband's brother!" The counsel gave up any more questioning on this point.

It has been estimated that a hospital doctor walks an average of 18 miles a day in the course of his duties; a shop assistant eight miles; a waiter 12 miles, and a train conductor seven miles.

Raw recruits are probably no called because they are not accustomed to fire.

Misses: "Is there anything we require from town?"  
Maid: "Yes, the china will not last us over Sunday,"—Kasper, Stockholm.

## Farmers' Marketing Tour

Canadian National Railway Tour To Great Britain and Denmark, 1928

(Continued.)

New experiences awaited us the following day when as guests of the Port of London Authority, we were taken to see something of what London's handling facilities are. It was not possible to see more than a small part, for the Port of London, in one year, handles merchandise to the value of hundreds of millions of pounds sterling. For example, the imports and exports passed through the port in 1926 totalled in value \$3,500,000,000 and included 65,000,000 bushels of wheat. In the same year 50,000,000 tons net register of shipping entered and left the port. Walking through one set of show-rooms, ten acres in extent, we visited the Ivory Room, where we were afforded to see a perfect array of pre-historic mammoth tusks 11 feet long, weighing 163 pounds, and having an estimated age of 10,000 years. In the State Room \$325,000 worth of pepper was stored, and an interesting exhibit was a 28 lb. barrel floating in a bath of mercury. The Wool Room contained a number of bales of Canadian wool stored in a single year nearly 2,000,000 bales.

Another interesting warehouse was the Jodine Room, holding 25,000 small hide-bound kegs of iodine, every one worth \$500. The hide covering is necessary because of the rotting effect of iodine which destroys the wooden kegs in a comparatively short space of time.

But the day came when we explored a portion of the Port's wine vaults. Before descending to the cellars, we were handed oil torches fastened to the end of staves. Torches such as these have been used for 120 years. The temperature of the vaults never varies from 60 degrees, yet the only means of regulating it are incandescent lights, and the amount of electricity on the floor. Fungus produced on the roof of the cellars by the fumes of the wine is a curious sight.

In the brandy vaults this fungus is absent. Twenty-two thousand pipes of wine, each worth \$500 can be accommodated in these vaults which have twenty-eight miles of metal runways, apart from the vast stores of spirits contained in other vaults not included in the day's itinerary.

Again in the open air we boarded a launch en route to the S.S. Minnewaska, where we were due to lunch. Again in the open air we boarded a launch en route to the S.S. Minnewaska, where we were due to lunch. Again in the open air we boarded a launch en route to the S.S. Minnewaska, where we were due to lunch.

In the evening we were the guests of the Empire Products Board at dinner in the Hyde Park Hotel and had an opportunity of learning at first hand the valuable marketing of Empire products. The Board is a non-party body and includes representatives of the Dominion and Colonies, Agricultural research and also an important phase of its work. The Board is a non-party body and includes representatives of the Dominion and Colonies, Agricultural research and also an important phase of its work.

The next day's programme provided one of the most interesting mornings of our stay in London. This was a visit to the Tower, a grim fortress which we entered with mixed feelings, for here and there we glimpsed some of the most renowned men and women of their day. Here the beautiful Anne Boleyn was beheaded; and here Lady Jane Grey saw the headless body of her husband carried past her on the morrow when she knew that she was to die. In it Sir Thomas Moore, Archbishop Cranmer, Sir Walter Raleigh and the little Princes met their tragic fate, and through these things happened in the days gone by one feels the Tower to be sinister still. Even in our own time it was not chosen as the place in which the spies in the Great War should meet their doom?

We were admitted by Yeoman of the Guard "Beefeaters", who still wear the quaint uniform which was adopted in the time of Henry VII. We were shown the Bloody Tower where the bones of the two murdered Princes were found and the room (reconstructed), in which Sir Walter Raleigh, when a prisoner wrote his History of the World.

In the White Tower we saw the chamber in which Guy Fawkes and his fellow-conspirators were tortured in 1605. Here too, were the apartments occupied by Queen Elizabeth when she herself was a prisoner in the Tower. We saw the block and execution axes, one of which has a nick in the blade where it struck the neck of a victim. And then, how close to our Canadian hearts it came, we saw the cloak on which Wolfe died on the Heights of Abraham.

Many quaint forms are still retained in the administration of the Tower. The gates are shut at night to the accompaniment of ancient ceremonial and after midnight no one may enter the precincts without giving the password.

In one of the strong rooms of the Tower there repose the Crown Jewels, including the crown of King George and Queen Mary, a display of treasure which amazed us all.

The Tower of London was built by William the Conqueror, and it is said that the site on which it stands was selected by Julius Caesar as a location for a fortress. One of the most interesting features of the Tower is the fact that it is the only building in London which has never been destroyed by fire.

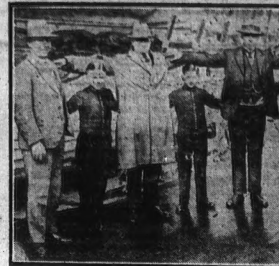

er in the portcullis, said to be the oldest one in existence in working order. On our way to the Tower we stopped at St. Paul's Cathedral, where Christopher Wren's masterpiece, but owing to the gouting operations on the piers which support the great dome, it was not possible to see its interior to advantage, most of it being boarded up and in ruins. Thus, we did not see the crypt or enter the Whispering Gallery.

(To Be Continued.)

Three stalwart crofters, all over six feet in height, who left the Hebrides where they "scratch a bare living by tending sheep," to settle in Ontario. They reached Canada last week in high spirits. The picture shows some cabin boys comparing their stature with the settlers aboard the liner Letitia, on which the Hebrideans arrived in Canada.

## STALWART HEBRIDEANS

Three stalwart crofters, all over six feet in height, who left the Hebrides where they "scratch a bare living by tending sheep," to settle in Ontario. They reached Canada last week in high spirits. The picture shows some cabin boys comparing their stature with the settlers aboard the liner Letitia, on which the Hebrideans arrived in Canada.

## Recipes For This Week

(By Betty Barclay)

## FRIZZLED BEEF FOR HOT DAYS

Melt butter in hot frying pan, add dried beef, and stir until it browns and curls. Add more butter for cream sauce. Add flour and stir until well blended. Add milk gradually until desired consistency is obtained. Stir to avoid lumps.

Use the proportion of 2 tablespoons of flour to 1 cup of milk. If the dried beef is too salty, soak for 10 or 15 minutes in cold water; drain thoroughly and dry by patting between folds of clean, dry cloth. Have dry before adding to melted butter. Serve on toast if you wish.

## ORANGE AND RHUBARB SAUCE

2 pounds rhubarb.

2 oranges.

1½ cups sugar.

1 tablespoon granulated gelatin.

1 tablespoon cold water.

Wash rhubarb, cut into inch pieces; peel oranges, removing membrane with peel, and cut in small pieces; put rhubarb, orange, and sugar in an earthenware or glass baking-dish, and bake about one hour. Dissolve gelatin in cold water, add to rhubarb mixture, and when cool, fill individual pastry shells with sauce, and decorate with whipped cream, forced through pastry bag and rose tube.

## Came From Many Lands

Common Vegetables Were Not Used Few Centuries Ago

Vegetables did not form part of a meal a few centuries ago, as they do today. In those days the dishes consisted mainly of flesh, fish or fowl.

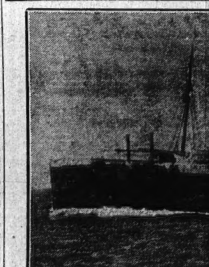

Potatoes were introduced into England by Sir Walter Raleigh from Virginia, over 300 years ago. They did not, however, come into general use until the beginning of last century, when they were very wisely—always cooked in their skins.

The Romans knew the onion, turnip, cauliflower, and cabbage, to which last vegetable they ascribed the quality of preserving them from drunkenness.

Cucumbers are said to have originated in India, and were known to have been introduced into China 200 B.C.

The carrot came from Greece, and the English name is derived from a Greek word meaning "root."

## POPULARIZING THE ST. LAWRENCE ROUTE

The fast maiden voyage of the Canadian Pacific liner "Duchess of Bedford," just put into the service of the St. Lawrence route as the finest of a quartette of 20,000-ton Canadian Pacific steamers has called wide attention to the increasing popularity of the St. Lawrence route.

In addition to the "Duchess of Bedford" three other "Duchesses" will shortly be commissioned and this fleet of cabin class steamers will constitute the largest ships to call at Montreal. Their time-schedule is so arranged that it is now possible to breakfast in Liverpool on one Friday and in Montreal the following Friday—an unique service for the St. Lawrence.

## SUNDAY SCHOOL LESSON

JULY 9

SAUL AND STEPHEN

Golden Text: "Be thou faithful unto death, and I will give thee a crown of life."—Revelations 2:10. Lesson: Acts 7:54-8:3; 22:3, 4, 10; 20:4, 5, 9-11; Galatians 1:13, 14. Devotional Reading: Psalm 116:12-19.

## Explanations and Comments

Stephen's Arrest and Defense, Acts 6:8 to 7:56.—When the Greek speaking Jews who were temporarily or permanently staying in Jerusalem attempted to dispute with one of the leaders among the disciples of Jesus, they found this man, Stephen, more than a match for all their logic and religious philosophy. Their original hatred of him, as a man full of faith and of the Holy Spirit (Acts 6:5), and therefore full of grace and power, then turned into cunning malignity. They resorted to calumny, raised up false witnesses against him, seized him and brought him before the Sanhedrin.

From Stephen's defense, 7:48, it is evident he had correctly taught that God could be worshipped not only in the temple, but everywhere. As was true with Jesus (Mark 14:58), Stephen's words were distorted by false witnesses. He was accused of teaching that Jesus of Nazareth would destroy the honored temple, a spiritual religion, and that God had no need of an earthly temple. At first, apparently fascinated by the clarity and truth of his words, his hearers were silently attentive; but as they caught the drift of his argument they displayed signs of anger which Stephen could not fail to see.

If, before the coming of the violent and which he saw approaching, Stephen was to apply his words to his hearers, he must speak quickly. "Ye do always resist the Holy Spirit," he cried boldly. "Of the Righteous One ye have become murderers!" At once they "were cut to the heart"; they "gnashed on him with their teeth"; that is, only by a "brute-like grinding of their teeth" were they able to restrain their unreasoning rage. But, still filled with the Holy Spirit, said "I saw the heavens opened, and I saw Jesus sitting at the right hand of God." (Acts 7:55-56) (a familiar Jewish figure of speech signifying one's insight into divine things) "and the Son of Man standing on the right hand of God"; and, in apparently utter disregard of the frenzied fury around him, he told of what he saw.

Alone a man can stand up for his rights; but he must organize to find new rights to stand up for.—Oshawa Times.

## Canada's Flying Clubs

Eleven Already Established and Ten More Being Organized

Hon. J. L. Ralston, Minister of National Defence, has opened the new flying field of the Granby Light Aeroplane Club, Granby, Que.

Canada now has 11 light aeroplane clubs, extending from Granby, Que., to Victoria, B.C., with ten others in process of formation. Fourteen Moth planes have already been allotted to these organizations by the Government under the conditions governing the issue of these machines. Additional to the Granby club, those already formed and with whom agreements have been signed by the Minister of National Defence are:

Montreal, Toronto, Hamilton, Ont., Winnipeg, Regina, Moose Jaw, Saskatoon, Calgary, Edmonton, and Victoria, B.C.

Clubs in process of organization are located at:

Halifax, Saint John, Quebec, Kingston, Ottawa, London, Peabrook, St. Catharines and Walkerville, Ont.

## Alberta Act Invalid

Privy Council Upholds Ruling Of Supreme Court Of Canada

Both the appeal of the province of Alberta, and the counter appeal of the Dominion of Canada from a Canada Supreme Court decision respecting the question of whether the right of the Crown upon intestacy is a provincial or Dominion right were dismissed without costs by the judicial committee of the Privy Council. The case involved the validity of the Ultimate Heir Act of the legislature of Alberta.

The judgment of the Privy Council upholds a ruling of the Supreme Court of Canada that the Ultimate Heir Act of Alberta is invalid. The Act provides that where a person dies without legitimate heirs, certain of the property goes to the University of Alberta.

## Receives Large Salary

Chief Harpooner Earned \$30,000 In Nine Months' Whale Hunt

Few occupations tax the nerves of man more than whale hunting, but few occupations pay better. When the whale-hunting fleet recently returned from the Atlantic after a nine-months' cruise, the chief harpooner had a "roomful" in income of \$33,000. In addition to this sum he had a contract granting him \$20 for each whale he killed. During the nine months he killed 300 whales, and his extra income amounted to \$6,000. Hardly an "easy" job, as the harpooner has a "roomful" of work. It is upon his ability that the result of the expedition largely depends, and though his profit may seem high, it is modest compared with the profit he brings to the expedition.

## Changes Name Again

Peking Will Be Known As Peiping

Meaning "Northern Peace"

The nationalist government political council has decided to change the name of the historic Manchurian capital, Peking, to "Peiping," meaning "Northern Peace."

The action is considered at Shanghai as an attempt by the Nanking government to destroy Peking's political importance and further that of Nanking, which they insist is now the National capital.

The announcement of the action of the council states "it is hoped Peking will continue as a centre of art and culture, but as a political centre it is dead."

## Should Be Popular

Aerial tea parties every Friday afternoon throughout the summer have been arranged by the Imperial Airways, to enable Londoners and visitors to see the Metropolis from the air. A big 21-seater aeroplane will cruise above London about 30 or 40 minutes, and tea will be served.

"Now, children, are you telling fairy stories?"  
"No. We are discussing the divisibility of the atom and the statistics of bankruptcy!"—Lustige Kolner Zeitung, Cologne.

## When Food Sours

About two hours after eating many people suffer from sour stomachs. They call it indigestion. It means that the stomach nerves have been over-stimulated. There is excess acid. The way to correct it is with an alkali, which neutralizes many times its volume in acid.

The right way is Phillips' Milk of Magnesia—just a tasteless dose in water. It is pleasant, efficient, and

harmless. It has remained the standard with physicians in the 50 years since its invention. It is the quick method. Results come almost instantly. It is the approved method. You will never use another when you know.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

CHAPTER XXVII—Continued

The next day Helmi went to the North Star Rooming House, walking wearily up the stairs to No. 19. Mrs. Corbett opened the door to her as she had four months before, and again the anguish in the girl's face told its own story.

"My God! Helmi, is she dead?" asked Mrs. Corbett.

Helmi sat down before she answered.

"Is that all? Sure that's nothing, every child takes a scarlet fever. They're grand at the Isolation Hospital. I know big Miss Shaw up there, as grand a girl as ever went on rubber heels. Cheer up, Helmi, the little pet will be all right, please, God."

"But only for a moment," Helmi thought, the cynic had stolen her by the look on your face, and I'm glad it's nothing worse than scarlet fever."

"My man has gone to the war!" said Helmi bitterly; "I saw him on the train. He did not see me—he does not care about me."

Mrs. Corbett paused. This was a harder complication than the illness of little Lili, and for a moment even this determined optimist was flustered—but only for a moment.

"Well, sure, when he is, it's noble of him to go, Helmi—remember that. Now here, dear, take a cup of tea. Yes, you can, a mother can always take a cup of tea no matter what's gone, and it makes life look a little brighter. Drink it down, dear, and have another. You look better now. Don't get down to mourning, Helmi; there's nothing happened yet, that can't come right—remember that, and your darling, blessed child with God's blessing, will come through the fever just the way we all did, and your man will come back again."

"But he doesn't want me any more."

"I know now. The magistrate has turned him against me. I said I would kill that man, and I will."

"No, dear, no; you mustn't talk of killing anyone. God will deal with the wicked in His own good way. You come with me to the Army and you'll find comfort in God's love. No killing, though, Helmi, that's bad. And see, dear, I was forgetful! There's two letters for you—just came yesterday."

Helmi took them eagerly and opened one. "It's a mistake," she said, listlessly. "See, there's money in it. No one would send me money. It has been opened too, and sealed up again."

## MEDICINE FOR YOUNG GIRLS

Mothers Endorse Lydia E. Pinkham's Vegetable Compound

Sydney, N. S.—"My seventeen year old daughter took Lydia E. Pinkham's Vegetable Compound and she got her periods and pains. She could not go about much with the other girls as she was not strong enough. We got six letters and it did her a great turn. She's working out now in a store and walks three miles every morning and back in the evening."—MRS. MARY VANCE, 44 Logan Road, Sydney, N. S.

Pinewood, Ont.—"I constantly had pains in my back and side and spent two days in bed every month. I have taken three boxes of Lydia E. Pinkham's Vegetable Compound Tablets. They have done me good and I have had them in the house. I have recommended your medicine to several friends and have given it to my 17 year old girl."—MRS. ALYDIA OUBRE, Pinewood, Ontario.

W. N. U. 1740

and some one to spend his money, but—

In some ways he had been to blame—he had been too easy, too gentle and foolish. Eva and her friends laughed at him, he knew. The ease with which Eva was able to deceive him furnished many a good story for the lively company which sat the bridge tables.

It was when his mother came to visit him a year ago that the doctor began to see Eva as she was. Life had liked to imagine what she would be like when she was as old as his mother, who at sixty-five was as alert and eager-minded as ever, doing many of the things she had wanted to do all her life. To Eva she was a puzzle. How could anyone get such joy from going to the New Year "Tally of Sunday School Children"? Or why did anyone get up early on Sunday morning to go for a walk? Eva's studied politeness toward his mother irritated him, and it was a relief when his mother went over to Miss Abbie's to finish her visit. So passed another day. He had so often thought of what pleasure it would be to have his mother visit him. She was such a good sport, his mother.

Another matter was weighing heavily on the doctor's mind. More surgeons were needed at the front. Why should he stay here at ease? Dr. Brown, his young partner was seriously considering the matter. Dr. Brown had a wife and children—a wife who loved him. Dr. Brown had said that he would go, he being the younger man. That did not matter. Dr. Brown was needed here more than he, who had no one depending on him. Eva would be happier without him so long as the money held out.

These thoughts occupied the doctor's mind as he lay listening to the commotion across the hall. The first year of their married life, when he began to see that Eva had no intention of entering into his life seriously, he was sorely hurt. He had had dreams of domestic happiness since he was sixteen, and it is the loss of a dream that hurts the most. Now he was still hurt, but he was calmer. When criticism begins to fill the mind the tenderness of love is over. (To Be Continued.)

## Heart Not Automatic Pump

Simply Controls Flow Of Blood Says German Specialist

The heart is not an automatic pump sending blood to all parts of the body, as generally believed, says Dr. Mendelssohn, a famous heart specialist of Germany. The organ, he says, is simply a governor to control the orderly flow of the blood. This current being due to the constant outgo and intake of liquid caused by chemical action in the body cells. He further declared recently that the heart is a small, round, the size of a man's fist, "could not possibly be capable of driving the tremendous mass of blood through the entire body."

For Rheumatic Pains—The pains and aches of Sciatica and Rheumatism should be treated with Dr. Thomas' Electric Oil. The soothing and healing properties of this famous remedy have been demonstrated for fifty years. Use it also for inflammatory pains, cuts, bruises and sprains, either in human beings or the lower animals.

## Most Sensitive Device

Valuable Information On Blood Circulation Gained Through "Gegner Counter"

The "Gegner Counter" is an exceptionally sensitive device which is able by means of ionization produced to count the electrons which may enter it from any cause. It may be attached to a loudspeaker of conventional type and a loud noise will be heard as each electron enters. A use of it, almost as spectacular as the instrument itself has recently been made by Dr. H. C. Blumgart, of the Boston City Hospital. Dr. Blumgart injects an infinitesimal quantity of radio-active material into the arm of a patient, and with this counter traces the time for this material to be carried back to the heart and to the arm. He thus obtains valuable information on blood circulation.

## Had New System

Employer: "I trust you are not the kind of workman who drops his tools and runs when the whistle blows."

Applicant: "Oh, no sir, I always have my tools packed up long before the whistle blows."

## An Old Superstition

Two persons who wash their hands in the same water, or who dry their hands on the same towel are likely to go begging together, Sussex folk will tell you; but in the north of England, they say to do this signifies a quarrel.

## Take Census Of Animals

National Park At Jasper Teeming With Wild Life

A census has been taken of the wild animals in Jasper Park, which constitutes a sanctuary for wild life over 5,000 square miles in extent.

Park wardens have for some years periodically estimated the numbers of the large wild animals in Canada's national parks. Headed the list at Jasper Park, there are, according to approximate estimates, some 15,000 Rocky Mountain sheep, an equal number of mule deer, 5,000 to 6,000 caribou, 5,000 to 5,000 moose, 2,000 to 3,000 Rocky Mountain goats, 15,000 elk and 2,000 to 3,000 black, cinnamon and grizzly bears. For the smaller animals no figures are available, but there are large numbers of beaver, otter, fisher, marten, mink, muskrat and porcupines.

The wild life of Jasper Park is indicative of what may be found in the other great Canadian national parks of the Rockies, Banff, Yoho, Kootenay and Waterton. Together, these parks constitute a vast wilderness, an area of mountain scenery and protected wild life two-thirds as great as all Switzerland, and almost as large as Belgium.

## Royal Air Force Band

Will Be Heard At Western Points During the Summer Months

The band of the Royal Air Force, now on a three months' tour of Canada, and an engagement at the Canadian National Exhibition at Toronto, is the youngest among the first-class bands of military musicians in Britain.

The band, under the leadership of Flight-Lieutenant Amers, will play for a week at the fair at Brandon, Man., Calgary and Edmonton, Alta., Saskatoon and Regina, Sask., and for two weeks at the exhibition at Toronto, late in August. In the interval, between the western fairs and the opening of the Canadian National exhibition, the organization will give concerts at Victoria and Vancouver, B.C.; Seattle, Wash.; Lethbridge, Alta., and Winnipeg, Man., as well as other cities, and finally will reach Montreal and Quebec.

Miller's Worm Powders act mildly and without injury to the child, and there can be no doubt of its deadly effect upon worms. They have been in successful use for a long time and are recognized as the best preparation for the purpose. They have proved their power in numberless homes and have given relief to many children, who, but for the good offices of this compound, would have continued weak and enfeebled.

Little things frequently annoy a man—small boarding-house steaks, for instance.

"The Oeiger Counter" is an exceptionally sensitive device which is able by means of ionization produced to count the electrons which may enter it from any cause. It may be attached to a loudspeaker of conventional type and a loud noise will be heard as each electron enters. A use of it, almost as spectacular as the instrument itself has recently been made by Dr. H. C. Blumgart, of the Boston City Hospital. Dr. Blumgart injects an infinitesimal quantity of radio-active material into the arm of a patient, and with this counter traces the time for this material to be carried back to the heart and to the arm. He thus obtains valuable information on blood circulation.

Little things frequently annoy a man—small boarding-house steaks, for instance.

## Eczema Formed Painful Blisters Cuticura Healed

"Eczema started with a fine rash on my arms. After a time blisters broke out the size of a bean which were full of water and very painful. I tried to scratch them with my nails but to no avail. I had my hands and arms tied up from the ends of my fingers to my shoulders. Sometimes it kept me awake for hours."

A friend recommended Cuticura Soap and Ointment and I sent for a free sample. I purchased more, and after a few days I was over. (Signed) Miss Emily B. Davis, R. R. 1, Northwood, Ont.

Keep your skin clear by using Cuticura Soap, Ointment and Tablets for daily toilet purposes. Treat pimples and itching. If any, with Cuticura Soap and Ointment.

Send for Free Sample. Write to: Cuticura, P.O. Box 100, Station 100, Montreal, Quebec, Canada.

## Believe It Or Not

Electric Light Burned Unseen In Scotland For Twenty-Two Years

How a light in an unknown room in a theatre at Glasgow, Scotland, burned unseen for 22 years, has just been reported. When electrical engineers were asked to give quotations on overhauling the lighting system a certain line of conduit disappeared in a wall, and the trail ended. Nearby was a locked door, the key to which had been lost. No one from the manager to the call boy could remember that the door had ever been opened. It was forced. The unknown room had been used by billposters, and according to a poster lying there the place had not been used since 1906. A 16-candle-power carbon lamp was hanging brightly just as it had evidently been left by the last occupant of the room. The report adds that when the manager estimated the cost of the wasted light oil 60 watts for 22 years he faints.

## Arresting Decay In Wood

New Treatment Being Used May Make It Imperishable

A new tool has been invented for the purpose of giving logs a "hypodermic injection" to preserve them. This new scientific method is being used to inject into telephone poles a spreading paste that is said to keep them from rotting. The use is being applied to the poles of the line. This treatment of wood is a step that may lead eventually to complete arrest of decay. If that ideal is accomplished, buildings of wood can be erected that will be as imperishable as structures of stone, brick, or steel, while the cost will be much less. The effect will be that of transmuting wood into rock.

## BABY'S OWN TABLETS THE HOME DOCTOR

Baby's Own Tablets meet all the need that exists in every home where there are young children. They are a valuable and safe remedy for colic, soothing, but do not contain one particle of opiate or other ingredient that can in any way do the slightest harm to the most delicate child. Baby's Own Tablets reduce fever, relieve constipation, check diarrhoea, sweeten the stomach and allay the irritation that accompanies the cutting of teeth. They quiet the nerves and promote health-giving sleep and restore, in fact, they are as good as a doctor in the home, and once a mother has used them for her little ones she will use them again. Thousands of mothers bear testimony to this. Among them is Mrs. Hurst, Pine Falls, Minn., who says: "I was told to try Baby's Own Tablets by a friend who had used them for all her little ones and said she could not do without them. After using them for my baby boy I quite agree with her and certainly now they are the finest medicine in the world for little ones."

Baby's Own Tablets are sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

## Teeth and Health

Issued by The Canadian Dental Hygiene Association and Published By The Saskatchewan Dental Society

As a child, you may have thought a tooth pulled right through just as a piece of candy, it was easy.

Then one day, you noticed that when something sweet got into the "tooth" it hurt a little, but this soon passed away.

So you kept "mum" for fear you would have to go to the dentist.

Until, one night you awakened your parents with crying and announced between sobs that your tooth was "hurting."

Now, what had happened? Within each tooth is a chamber that is filled with soft, tissue-like vessels and nerves, and the decay which is a fungus process and been steadily progressing towards the "inside" until the soft tissue had become infected by the disease bearing organisms.

Then nature had rushed to the defense to combat them by sending in blood, containing millions of little warriors called "phagocytes." Some of these burst through the vessel walls to attack and destroy the bacteria with this increase of blood there was a swelling of the tissue, causing increased pressure on the nerve endings—which signalled to headquarters—and so pain resulted.

And, just as in battle, as the fight wages, the wires grow hotter—so the nerves signalled more furiously, crying loudly—until, by and by the fight was over and the wires cooled off and the pain was stilled—and you were so right, it was over, that you forgot to wonder how it stopped.

Edmonton Canning Factory

Edmonton's newest industry, the Broder canning factory, has started operations with 76 persons on the payroll. This is the first industry of this nature in Alberta.

"His compassions fail not; they are new every morning."—Lamentations iii. 22, 23.

New every morning is the love Our waking and uprising prove; Through sleep and darkness safely brought, Restored to life and power and

New mercies each returning day Hover around us while we pray; New perils past, new sins forgiven, New thoughts of God, new hopes of heaven.

—John Keble.

Each day, each week, each month, each year, is a new chance given you by God. A new chance, a new life, a new life, this is the golden, the unspeakable gift which each new day offers to you.

—Frederic W. Farrar.

Minard's Liniment for Insect Bites.

Two copies of every act of the British Parliament are printed on vellum. One, endorsed with the royal assent, is kept among the rolls; the other goes to the record office.

Don't Make a Toy Out of Baby—Babies Have Nerves—

By RUTH BRITAIN

Much of the nervousness in older children can be traced to the over-stimulation during infancy, caused by regarding baby as a sort of automaton toy for the amusement of parents, relatives and friends. Baby may be played with but not for more than a quarter of an hour to an hour daily. Beyond that, being handled, tickled, caused to laugh or even scream, will sometimes result in vomiting, and invariably causes irritability, crying or sleeplessness.

Patience, crying and sleeplessness from this cause can easily be avoided by treating baby with a few drops of pure, harmless Castoria. It's amazing to see how quickly it calms baby's nerves and soothes him to sleep; yet it contains no drugs or opiates. It is purely vegetable—the recipe is on the wrapper. Leading physicians prescribe it for colic, cholera, diarrhoea, constipation, gas on stomach and bowels, feverishness, loss of sleep and all other "upsets" of babyhood. Over 25 million bottles used a year show its overwhelming popularity.

With each bottle of Castoria, you get a book on Motherhood worth its weight in gold. Look for Chas. H. Fletcher's signature on the package so you'll not mistake Castoria. There are many imitations.

*There are  
Two Sides  
to this  
Story*

MOST people think of their Chevrolet dealer as a NEW-CAR dealer . . . partly because of the large number of new Chevrolets which they see on the streets. But, while new car sales are the Chevrolet dealer's biggest reason for being in business, they form only one side of his activities. He must not only sell cars but he must also exchange them.

Every good, successful Chevrolet dealer must also be a good, successful Used Car dealer.

From his experience in selling Chevrolet cars, he knows motor-car values. He knows that it is just as important for him to sell a Used Car as a new car. . . He knows that Used Car buyers have a right to as much for their dollar and are entitled to as complete satisfaction as new car buyers. . . He knows that satisfied Used Car owners will eventually become prospects for new cars. . . He knows the value of good-will.

In short, our business as Chevrolet dealers depends on our reputation as used car dealers. That is why you are sure of a square deal and a sound dollar-for-dollar value, when you buy a used car here. UC-7-7-18C

### HOME BANK AFFAIRS EXPLAINED

FERDIE, June 30.—The regular meeting of the Fernie Board of Trade had to be postponed on account of lack of a quorum. A letter had been received from the bank, recently in conference here, highly commending Ferdie on the way the business places were decorated.

In answer to a previous letter from Fernie Board of Trade, requesting a statement of Home Bank affairs since it went into liquidation, a statement was received from the liquidators, which read in part as follows: The liquidation of the bank is being conducted by the liquidators under the supervision of the Master of the Supreme Court of Ontario, and with the knowledge and approval of all important matters of a board of inspectors appointed at a general meeting of creditors. The members of this board represent in an excess of 80 per cent of the liabilities of the bank. Also the accounts and receipts and disbursements of the liquidators are checked at regular intervals by a member of the national committee representing the depositors, whose appointment was approved of by the court.

Relative to the position of the estate, when the dividend of 25 per cent was paid to depositors, it was necessary to borrow \$3,700,000 from other Canadian banks, while also the payment of certain Federal and Provincial government claims, amounting to about \$1,500,000, which were preferential, had to be deferred. The advances so obtained from the banks have been repaid and the government claims have been reduced to \$400,000. In addition, the notes of the bank in circulation have been redeemed to the amount of approximately \$1,700,000.

In other words, in excess of \$6,500,000 has been paid to creditors of the bank.

In addition to the above amounts, not less than \$500,000 has had to be advanced by the estate in the protection of real estate and other assets in which substantial and valuable equities, which had to be protected, exist. The value of these assets, in respect all of which the inspectors are fully informed, is indefinite, but with real estate, timber and coal properties held, will probably aggregate upwards of \$1,500,000 at least and possibly two million.

Certain litigation exists wherein creditors who deposited money in the bank within ten days prior to and immediately following suspension, are endeavoring to recover the same in full from the estate. If these creditors are successful the amount to be returned will probably aggregate not less than half a million, which will seriously impair the future dividend to be paid. On the other hand, if the contention shall not be upheld by the courts, sufficient assets should remain in the estate to ultimately pay the creditors a further dividend of 6 per cent and possibly a little more, but in this juncture it is unwise to attempt any closer estimate, having regard to the character of the assets remaining to be divided of it is improbable that these assets will be completely liquidated within at least two or three years, and any attempt to sell them at a sacrifice price would largely deprive creditors of the further dividend to be paid to them. The inspectors have expressed themselves as opposed to any attempt to force the sale of such assets under such conditions.

### THE PASS FIFTEEN YEARS AGO

(The Blaimore Enterprise, 1919—April 4.—Bob Campbell addressed a meeting of Conservatives at the Blaimore opera house on Tuesday night. The chair was occupied by James Burrows. On the platform were H. E. Lyon, L. H. Putnam, A. I. Blais and J. M. Carter.

The Lebridge News remarks: The marriage of the Liberal-Labor-Socialist parties for election purposes in the south country is having a very natural result. H. Smith, of Coleman, a well-known labor man and socialist, has publicly denounced the whole combination and allied himself with the Conservatives.

At a conservative convention held at Lundbreck on Saturday, the names of H. E. Lyon, A. C. Cooper Johnson, L. H. Putnam and Robert Campbell were submitted for nomination, the choice of the convention being Bob Campbell. He will be opposed by Charlie O'Brien, Socialist, and Bill Powell, Liberal-Labor.

Spaniel Pups for sale. Apply to Alex. Morency.

Robert Smallwood has taken up residence on Main Street, south, next the blacksmith shop.

Miss Ethel Welch came down from Coleman on Wednesday to attend a meeting of the suffragettes.

W. H. Murr and W. F. Stanley had a dream at Coleman on Monday night, from which they have not yet fully recovered. They dreamt that they

were sleeping in the Cosmopolitan hotel at Blaimore, where the yip-yap of the elevator sounded so much like the catfies that a mild form of intoxication resulted. Stanley reached for the phone and ordered a rig from Joe Plant to take them to Dr. Lee Hing, but on waking were a little surprised to find themselves occupying a chest in the safe of the Passburg hotel fully draped and wondering how this miracle.

Rev. W. H. and Mrs. Muncester and Elder W. P. Williams will represent Blaimore at the general assembly of the Presbyterian Church in Canada at Toronto in June.

J. W. Gresham this week opened up his wheelwright and blacksmithing business in Blaimore, in the premises formerly occupied by Dick Slugg.

J. Charbonnier, newly appointed technical manager of the West Canadian Collieries, Limited, arrived last week from Paris to succeed Mr. J. Bitterst.

Born, at Bellevue, on Easter Sunday, to Mr. Mr. and Mrs. William Newton, a son.

P. Burns & Co. this week closed their store at Frank, moving the plant to Blaimore.

Miss Isobel Murdoch, who has been appointed to succeed Miss Berry on the Frank teaching staff, arrived Monday morning.

James M. Fetter has been appointed to succeed C. J. Pegg as manager of the local plant of the Rocky Mountain Cement Company. Mr. and Mrs. Pegg left yesterday for Edmonton.

Arthur M. Densmore was in town from Lundbreck today.

April 11.—The total registration at the Blaimore school for the month of March was 307, and the average attendance was 55.88. The following pupils attended regularly for the month: George Kafours, Henrietta Robbins, Maurice Bond, Albert Thibodeau, George Lyon, Elizabeth Patterson, George Bond, Archie McLeod, Edward Thibodeau, Marion Evans, Lillian Evans, Mabel Kafours, Russell Vincent, Wilfred Dull, Glen Mison, Jeannette Thibodeau and Minnie Nemrava.

In the police court on Friday last, H. E. Lyon, mayor of Blaimore, answered at the invitation of Corporal Meale, of the R.N.W.M. Police, and paid a fine and costs to the extent of \$4.50 for operating an automobile (Ford) without a license.

Fred W. Dought and W. J. Bartlett have been appointed deputy returning officers for Blaimore for the forthcoming election.

A miner named Robert Cullen was killed at Hileret on Tuesday evening.

A birthday party was given Monday evening by Miss Deborah Litherland at her home at Maple Leaf.

The new store of P. Burns & Co. at Bellevue is nearly completed and will be opened in a few days.

The marriage of Richard Alder Davis, of Blaimore, to Mary Moxin, of Blaimore, was performed by Rev. J. P. Hunter on Wednesday afternoon. A wedding supper was served at the home of Mrs. James Burrows. Among the guests were: Mr. and Mrs. Alder of Blaimore; Mr. and Mrs. W. Hilton, of Frank; Misses Effie Beard and Hazel Ennis; H. Pinkney, of Hoya; D. Marshall, C. Roy and Mike Moxin.

The infant son of Mr. and Mrs. W. Newton died at Bellevue Sunday morning.

A christening ceremony took place at the home of Mr. and Mrs. James Couzens at Bellevue on Monday, when their infant daughter was named Florence Ruby. Rev. W. H. Irwin officiated.

Joseph Handley and son Vernon, of Creston, visited relatives and friends here over the week end, motoring through with Frank Celli. It is upwards of ten years since Mr. Handley left Blaimore, and he expressed his surprise at the many changes that are noticeable around town in that time.

It's a pity there isn't a game law to restrict the bull shooters.

Many a man who is a good shot in this world hopes he will miss fire in the next.

"With a single stroke of the brush," said the school teacher, taking his class around the national gallery, "Joshua Reynolds could change a smiling face to a frowning one." "So can my mother," said a small boy.

**BLAIRMORE UNITED CHURCH**  
Rev. J. W. Smith, B.D., Pastor  
Serve the church that the church  
may serve you.

Services for Sunday, July 8th, the  
Pastor in charge:

SENIOR SCHOOL, 11 a.m., young  
people over 12.  
JUNIOR SCHOOL, 2 p.m., boys  
and girls under 12.  
EVENING WORSHIP, 7:30 p.m.  
"Enter into His gates with thank-  
sgiving, and into His courts with  
praise; be thankful unto Him and  
bless His name."

**VACATION SCHOOL, JULY 9 to 27**  
Try this recipe: "Take 150 chil-  
dren, more or less. Mix well in  
some cool church on a hot summer  
day. Add the Vacation School Pro-  
gram of Bible Stories. Supervised  
Hand-Work, and other expressional  
activities. Stir in some Pies, and a  
generous portion of good times.  
The result are guaranteed to satisfy  
any forward looking church."

It keeps the children off the streets  
and happily employed in vacation  
time, but it does more—in the month  
of July each year it gives parents  
additional hours of opportunity for  
the church—almost one year of Sun-  
day school time.  
A mother's testimony: "I consider  
the Vacation School a wonderful ben-  
efit to children; also it is indeed a  
boon for a busy mother to know her chil-  
dren are safe, and learning only that  
which is good in vacation time."  
July 8th to 27th, in United Church.

#### BELLEVUE UNITED CHURCH

A large and appreciative congrega-  
tion were present at the Bellevue  
United church on Sunday, July 1st,  
when a special patriotic service was  
held in the evening. In the absence  
of the quartette, some of whom were  
unable to attend owing to the bad  
condition of the roads, Mr. George  
Goodwin rendered a cornet solo in a  
very finished and artistic manner.  
Miss Evelyn Price recited "My Flag  
and My Flag" very effectively. The  
services of worship which came after  
this, followed the order of service pre-  
scribed for the United Church of Can-  
ada on Dominion Day.

From the manner in which the  
large congregation joined in the uni-  
son prayers and scripture readings,  
it was evident that they greatly en-  
joyed this form of worship. All the  
hymns, especially "From Ocean Unto  
Ocean" and "Lord of the Land" were  
sung with an enthusiasm and feeling  
seldom heard even in larger  
congregations.

Mr. Arthur Hadwell sang "There's  
a Jam" in such a manner as to  
thrill the congregation. Another  
solo, "Only an Arrow Bearer" was  
sung very sweetly by one of our local  
boys, Master A. Hadwell. Our  
minister, Rev. J. L. Wright, deliv-  
ered an able sermon on "National  
values of noble friendship." Mr. Al-  
bert Christie ably presided at the or-  
gan.

For the next two Sundays, the Rev.  
Roy C. Taylor will conduct the ser-  
vices in Bellevue United church at  
7:30 p.m., after that our pastor, Rev.  
T. L. Wright expects to return from  
his holiday and will conduct services  
in Hillcrest as well as Bellevue while  
Taylor is on his vacation at  
Pigeon Lake.

#### COWLEY HAPPENINGS

Three inches of rain fell here dur-  
ing the past week.

Miss Mary Drewery has returned  
from spending several weeks in Cal-  
gary.

Mr. and Mrs. James Smyth and  
children have gone to Vancouver for  
an extended holiday.

Mr. Austin Brownie, principal of  
the village school, has gone to Cal-  
gary for his holidays.

Mr. and Mrs. Ralph Easterbrook  
motored to Calgary on Friday, where  
they will reside in the future.

Mr. and Mrs. W. F. Blackburn and  
daughter Sylvia, of Fishburn, spent  
the week end the guests of M. A.  
Murphy and family.

Mrs. Hood, of the teachers' staff  
here, left on Tuesday's local passen-  
ger train for a visit to Vancouver,  
Victoria and other points.

Rev. and Mrs. R. W. Griffith left  
by motor on Thursday night for  
Craigville, to where Mr. Griffith has  
been called as minister of the United  
church.

A whist drive and dance was held  
in the parish room of the Anglican  
church by the Women's Auxiliary on  
Wednesday night. The sum of \$8.00  
was added to the church funds.

The regular monthly meeting of  
the Women's Institute was held at  
the home of Mrs. Morrison on Wed-  
nesday evening. The meetings have  
been suspended for the summer  
months, after which the work will be  
resumed again.

Mrs. Drake, teacher of Olin Creek  
school; Miss Annie Hamilton, teacher  
of Tennessee school, and Miss Mabel

**The Motor Oil for every car**  
En-ar-co Motor Oil—"the Oil of a Million  
Tests"—adds years to the life of your  
motor and cuts down your repair bills.  
CANADIAN OIL COMPANIES, LIMITED

Shepherd, teacher of Tennyson school,  
have all gone to their respective  
homes at various points for the sea-  
son's holidays.

Considerable excitement was  
aroused on Thursday night around  
12 o'clock, when a wild and boister-  
ous crowd gathered about the home  
of Mr. and Mrs. Cowin for the pur-  
pose of serenading the newly weds.  
Mr. and Mrs. Ralph Easterbrook, who  
had just arrived from a motor trip to  
the coast. The noise kept up loud  
and clamorous until the happy couple  
were aroused from their slumbering  
and forced to dress and march ahead  
of the band up to the chink's con-  
fessionary, where again the noise was  
in full force until the Oriental clam-  
ored from his rest to quieten the  
mob, when Ralph gave them the sat-  
isfaction of a treat in his good-na-  
tured way.

On Monday evening the Masons of  
the district met in the Cowley lodge  
room, upwards of fifty being in at-  
tendance from Pincher Creek, Cow-  
ley and Hillcrest, including Past  
Grand Master Cruickshank and other  
distinguished brethren. The occasion  
being the annual installation of the  
officers of the Cowley and Pincher  
Creek lodges. Past Grand Master  
Kenniss officiated as installing offi-  
cer. This was also a farewell to  
Bro. Kenniss, a member of both  
lodges, who was due to take up his  
official duties in Calgary as grand  
secretary. A sumptuous banquet was

served in the Cowley hotel after the  
meeting, at which Bro. Kenniss was  
made the recipient of a presentation  
by his fellow members of Pincher  
Creek.

#### ALBERTA BASEBALL CHAMPIONSHIP PLAYOFFS

Entries for the Alberta baseball  
championships will close at noon,  
Monday next, July 9th.  
Entry fees are: senior "A" \$20.00,  
senior "B" \$15.00, intermediate \$10.00,  
juvenile and midge teams, free.  
All players must have baseball  
playing certificates and all clubs must  
register their players before noon,  
Saturday, July 14th.

Playoffs will commence Wednesday,  
July 18th. Full details re champion-  
ships can be obtained from E. D. Bat-  
man, honorary secretary, 219 P.  
Burns Building, Calgary, Alberta.

#### COLEMAN BOARD OF TRADE ELECTS OFFICERS FOR 1928

At a well attended meeting held  
recently, the re-organization of the  
Coleman Board of Trade was effected,  
with the following officers elected:  
Honorary presidents, A. C. Flum-  
felt and J. A. Novell; president, Alex.  
M. Morrison; vice-president, Tom  
M. Allen; secretary-treasurer, H. T.  
Halliwell. Committee chairman, Cul-  
lidy; W. S. P. writer, tourist, A. V.  
Morrison; municipal, P. C. McIl-  
roy; industrial, M. W. Crocker-Ross.

W. L. Riddon, highway, W. J. Thom-  
son, park and lake, O. E. S. Whiteside; en-  
tertainment, George Kellock.

On Sunday evening last, Rev.  
Father Donovan, parish priest at  
Bellevue-Hillcrest, left on a visit to

his home in St. John, N.B. On Sun-  
day after the morning services at  
Bellevue and at Hillcrest, the faithful  
bade him goodbye and presented gen-  
erous gifts. His place will be taken  
in the Pass by Rev. J. Dunbar, B.A.,  
of Calgary.

## 125 Times Around the World

**IN** pursuing its policy of consistent pro-  
gress—in its continual search for new  
ideas—in its constant development  
of better cars—General Motors not  
only maintains its great International  
Research Laboratories and hundreds of  
skilled engineers, but also operates the  
first, largest and most completely equip-  
ped automobile proving ground in the  
world.

Here, on the vast fourteen-hundred-acre  
tract of the General Motors International  
Proving Ground, every type of road is  
duplicated, every condition of driving is

reproduced. Here all makes of General  
Motors cars are constantly being sub-  
jected to the most searching tests. Here  
every principle developed by General  
Motors engineers is put to proof...  
every detail of each test car's perfor-  
mance carefully and closely checked.  
Here years of normal use are crowded  
into a few months of continuous, gruel-  
ing operation.

A typical example is offered by Chevrolet.  
Since the opening of the General Motors  
Proving Ground, Chevrolet  
cars alone have piled up  
over three million miles of

testing... a distance equal to 125 times  
around the world.  
In the countless millions of miles that General  
Motors cars have covered on the General  
Motors Proving Ground, there has been one  
great purpose kept in view... to improve,  
by constant testing, the quality and worth of  
every General Motors product.  
Every Canadian buyer of a General Motors car  
gets a car built in Canada by Canadians to meet  
Canadian conditions of road and climate... a  
better car and a greater value because General  
Motors uses so freely and unsparingly its un-  
equalled facilities for testing and research...  
With better General Motors cars at the end  
of the journey, millions of miles is not too far  
to go.

## Another Step Toward Permanent Peace

Throughout the years of the Great War, the people of the allied nations were repeatedly told that it was a war to make the world safe for democracy, "a war to end war." And when at last the great struggle ended and the League of Nations came into being it was thought that, with the bitter experience of the war fresh in all minds, there would be little hesitation on the part of any country to join the League, and that, with 100 per cent. world membership in the League, world disarmament would follow in due course.

The refusal of the United States to have anything to do with the League of Nations—the very country in which the idea originated—came as a rude shock to all lovers and advocates of peace. It discouraged Europe, re-awakened all the old fears, and actually led to renewed activity in the piling up of armaments. Nevertheless, the League struggled on, gaining new adherents, and, with each succeeding success in settling international disputes and preventing open ruptures, the League grew in strength and prestige. Nonetheless, so long as the United States remained aloof it was felt that the structure for world peace was imperfect and insecure.

Because of this fact, the recent action of Mr. Kellogg, United States Secretary of State, in inviting the nations of the world to enter into a multilateral treaty to outlaw war, was enthusiastically welcomed by all lovers of peace, and nowhere quite so heartily as in Canada and other parts of the British Empire.

Already fifteen nations, including, with the exception of Russia, all the Great Powers, have signified their willingness to sign such a treaty. The draft of this momentous international document is brief and to the point, and, as it may well prove to be the Magna Carta of world peace, it is worthy of the widest possible reproduction in order that all people, everywhere, may read it. The preamble, in part, is as follows:

"Deeply sensible of their solemn duty to promote the welfare of mankind;

"Persuaded that the time has come when a frank renunciation of war as an instrument of national policy should be made to the end that the peaceful and friendly relations now existing between their peoples may be perpetuated;

"Convinced that all changes in their relations with one another should be sought only by pacific means and be the result of a peaceful and orderly process, and that any signatory power which shall hereafter seek to promote its national interests by resort to war should be denied the benefits furnished by this treaty;

"Hopeful that, encouraged by their example, all the other nations of the world will join in this humane endeavor, and by adhering to the present treaty as soon as it comes into force, bring peoples within the scope of its beneficent provisions, thus uniting the civilized nations of the world in a common renunciation of war as an instrument of their national policy."

Then follows the names of the fifteen nations who have signified their willingness to sign such a treaty, namely: Australia, Belgium, Canada, Czechoslovakia, France, Germany, Great Britain, India, Irish Free State, Italy, Japan, New Zealand, Poland, South Africa, United States of America.

"To what do they agree? Having approved the declarations in the preamble quoted above, they bind themselves as follows:

"Article I. The high contracting parties solemnly declare in the names of their respective peoples that they condemn recourse to war for the solution of international controversies, and renounce it as an instrument of national policy in their relations with one another.

"Article II. The high contracting parties agree that the settlement or solution of all disputes or conflicts of whatever nature or of whatever origin they may be, which may arise among them, shall never be sought except by pacific means.

"Article III. The present treaty shall be ratified by the high contracting parties named in the preamble in accordance with their respective constitutional requirements and shall take effect as between them as soon as all their several instruments of ratification shall have been deposited at (—).

"This treaty shall, when it has come into effect as prescribed in the preceding paragraph, remain open as long as may be necessary for adherence by all the other powers of the world. Every instrument evidencing the adherence of a power shall be deposited at (—), and the treaty shall immediately upon such deposit become effective as between the power thus adhering and the other powers parties hereto."

"That is the whole document, beautiful in its simplicity, momentous in its sweeping renunciation of war under any and all circumstances. It does not replace the League of Nations, but adds power and strength to it. No loopholes are left, and should any nation signing this treaty ever again resort to war it would become, as never before, an outlaw among the nations."

### Substitutes Cards For Pistol

Affair of Honor in Czechoslovakia Settled In New Way

Pistols have given way to cards in the settlement of "affairs of honor" in Czechoslovakia, judging by the method adopted by a business man at Bruenn, near Prague, to avenge an insult.

An engineer in the town is said to have given offence to the business man, who challenged him to a duel.

### A Wonderful Performance

Recent Flight Over Pacific Was Great Achievement For Flyers

The great flight over the Pacific Ocean by the Australian, Captain Kingsford-Smith, leader, and his companions, puts British prestige at the peak in this form of endeavor. The "Southern Cross" winged its way to fame under control of four men, each performing an essential task in making the trip scientifically safe and easy. This feature alone raises the Pacific flight out of the category of regular daredevil stunts and enhances notably the merit of the performance. Regular radio reports received from the Southern Cross during its flight robbed the journey of some sensational features beloved of the crowd, but detracted not a bit from the glory won by the fliers. Their accomplishment in the air, valuable because they made use of every possible device to combat the fury of the elements with man's most powerful weapons.

### HOW DELICATE GIRLS ARE MADE STRONG

Rich, Red Blood Needed To Keep Up Their Vitality

It should be borne in mind that pale, bloodless girls need plenty of nourishment, plenty of sleep, and regular out-of-doors exercise. But a lack of appetite and tired, aching limbs tend to hinder progress. To save the weak, thin-blooded sufferer, she must have new, rich blood, or nothing meets a case of this kind so well as Dr. Williams' Pink Pills. These pills not only cause the blood to flow, they help the appetite and aid digestion, relieve the weary back and limbs, thus bringing new health and strength and transforming anemic girls and women into cheerful, happy people.

The value of Dr. Williams' Pink Pills in the case of anemic girls is proved by the case of Miss Lucy Stoddart, Margerville, N.Y., who says: "From the age of 12 to 15, I was in an anemic condition. I was very thin and nervous, had no appetite and had no desire to take part in the doings of those of my age. My mother got quite after me for it, but they did me very little good. Then Dr. Williams' Pink Pills were recommended to me, and from the first they seemed to be just what was needed to restore my strength. After taking the pills for a time I felt an altogether different girl. I got up in the morning feeling bright and active, and ready for work or play. Since then I have always taken a couple of boxes of Dr. Williams' Pink Pills in the spring and in the fall, and have thus kept in the best of condition."

A weak girl should promptly follow the example of Miss Stoddart, feeling sure that the pills will renew her health. You can get the pills from any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

### Show Canadian Films

Views Of Canada To Be Shown In Britain and Central Europe

"Seeing Canada" films, made by Canadian Government, will be shown in from 200 to 500 British theatres this year as well as in Germany and Central Europe, says Captain Frank Badgley, M.C., director of the Canadian Government Motion Picture Bureau, upon his return from Great Britain. He expressed a belief that in the near future Canada would become an important field for the British Empire pictures.

### Eskimo Census Taken

A census of the Eskimo people has just been completed. From the most reliable sources it is estimated that there are 7,103 Eskimos in Canada.

Many mothers have reason to bless Mother Graves' Worm Exterminator, because it has relieved the little ones of suffering and made them healthy.

Yesterday is a waste-basket into which lost opportunities are dumped.

### BABY GIRL HAD DIARRHEA WHEN CUTTING TEETH

Mrs. A. J. Murray, Gull Lake, Sask., writes:—"Last summer, my baby girl was cutting teeth and became very weak with the effects of diarrhea. I didn't know just what to do for her as she couldn't retain anything. At last one of my neighbors said to me, 'Have you any...'"

why, I wouldn't be without it where there are children."

"My husband went to town and got a bottle, and the very first dose helped her wonderfully, and in three days she was well over the diarrhea and was running around as well ever."

Put up only by The T. M. L. Co., Limited, Toronto, Ont.

## "Swat the fly" with GILLETT'S LYE

Use Gillett's Lys for all Cleaning and Disinfecting

### The Sioux Lookout Map Sheet

Where the Miner's Pick Now Displaces the Tomahawk

The Sioux Indians were among the handiwork as well as the most warlike of the aboriginal inhabitants of North America.

Their memory is perpetuated in the Sioux Lookout map sheet of the National Topographic series, now issued from the press of the Topographical Survey of Canada. The new map embraces an area lying 150 miles north from Lake Superior and adjoining the Lac Seul map sheet on the west.

The town of Sioux Lookout gets its name from the precipitous hill overlooking it. From the top of the hill, in days gone by, the Ojibwas whose land it was, kept watch up and down the waterways from raising Sioux. On one occasion the lookout slept and the Sioux fell upon the camp. They tomahawked the warriors to a man, and destroyed all the canoes. The women and children with one decrepit old man were marooned up on an island near the site of the present town, and there they starved to death. The island is still called Squaw Island.

This country with its broken lakes and streams teeming with fish and chained with rapids and waterfalls, is a tourist's paradise. Here are old fur trading posts like Osnaburgh House, founded over a century ago. At Historic Lac Seul the chief factor of the Hudson's Bay Company has a four-hole golf course. (Ingress to the region is by way of the Canadian National Railways and thereafter by innumerable connecting waterways with launches, tugs, or canoes.)

This territory is part of the newly discovered mineral horsehoe emblemized on the area known as the great Canadian shield.

The Sioux Lookout map sheet of the National Topographic Series, on the scale of four miles to the inch, may be obtained in sheet form from the Topographical Survey, Department of the Interior, Ottawa, for the nominal fee of 25 cents. If desired in folder form of linen-backed the fee is 50 cents.

### For Both House and Stable.

There is a good deal of similarity, physically, between the human and the lower animals. Both are subject to many ailments arising from indigestion and to all manner of cuts and bruises. Dr. Thomas' Electric Oil is an entirely reliable remedy for such ailments and mislapses in both human beings and the lower orders of animals.

### A Great Germ Carrier

Common Housefly Carries With Deadly Disease Germs Says Scientist

The common housefly is literally covered with bacteria and deadly disease germs. Scientists have estimated that many flies carry as many as 8,000,000 germs. This estimate is determined as follows: A fly is placed in a small bottle of water. The water is then shaken so that the germs will all be washed off the fly, and they will be equally distributed throughout the water. A tiny drop, perhaps a millionth part of the water, is then placed on a glass slide and examined under a powerful microscope. The scientist counts the number of bacteria visible, say six. He then multiplies the six by 1,000,000, since there are about 1,000,000 such drops in the bottle, and his answer is that the fly carried 6,000,000 bacteria.

Manx, the native language of the Isle of Man, is dying out. More than 1,000 of the island's 50,000 inhabitants have now any working knowledge of it.

Sumner? Use Minard's Liniment.

### France Has Too Much Coal

Production Rises Until There Is No Need To Import

France, desperately short of coal for ten years, and always an importer, now has too much of it. For the first time French production equals consumption and imported coal is threatening to break the market.

When the Germans flooded French coal mines in the north during the World War, France lost half of her fuel and it has been a long struggle to get back to normal. Not only was the pre-war figure of 40,000,000 tons annually reached, but last year it went up to 60,000,000 and the Saar Valley has added another 15,000,000 tons.

All European coal mines have been working hard since the war because British strikes, the occupation of the Ruhr and the trouble in Upper Silesia created big shortages. Now that all are at work, Europe, according to French figures given to the League of Nations recently, has a surplus of 60,000,000 or 70,000,000 tons a year.

As all countries for generations have considered France as an importer of coal, they all still try to capture the market there, ignoring the fact that France now mines all she burns. Therefore, the French coal operators are puzzling how to reduce costs; curtail production and restrict imports so coal won't become too cheap.

### Railways Arrange New Circle Tour

Convenient Visit To Glacier, Waterton and Jasper Parks Is Made Possible

An arrangement has been completed by the Great Northern and Canadian National Railways to make available to tourists a circle tour three of the greatest playgrounds in the world. Under it tourists will be able to visit Glacier National Park, Alberta, without loss of time and at a considerable reduction in cost.

The inter-change point between the two companies will be Calgary where passengers for Jasper will take the Canadian National Railways and those for Waterton and Glacier will take Great Northern automobiles. The autos and the trains will make connections and summer tourist fares will apply in both cases. In the past it has only been possible for travellers to combine these places in one visit by making a round-about and expensive trip.

In Glacier and Waterton Parks the Great Northern Railway operates a number of splendid hotels, among which are The Prince of Wales Hotel, the Glacier Park Hotel, and the Many Glaciers Hotel. In Jasper the Canadian National Railways operate Jasper Park Lodge, a unique and distinctive summer resort.

### Dust Causes Asthma. Even a Little Speck Too Small to See Will Lead to Agonies Which No Words Can Describe.

The walls of the breathing tubes contract and it seems as if the very life must pass. From this condition Dr. J. D. Kellogg's Asthma Remedy brings the user to perfect rest. It relieves the passages and normal breathing is firmly established again. Hundreds of testimonials received annually prove its effectiveness.

### Find Blues Best Color

Blue is the most effective color to attract policemen at night, according to tests made by city officials of Sheffield, England. The city has just installed in outlying districts blue illuminated by powerful blue lamps, which when lighted by a switch in central office, summon the policemen from their beats to nearby telephones to receive instructions.

**A Fish Pool**

Latest Development In The Co-Operative Movement In Manitoba

A fish pool is the latest development in the co-operative movement of Manitoba, and after being talked over for years, the Manitoba Co-operative Fisheries Limited has been established. Heretofore all the energies and abilities of the men engaged in the industry in Manitoba have been directed almost wholly to the production end of the business, but now attention is to be paid to marketing.

Whether the corn be of old or new growth, it must yield to Followay's Corn Remover.

Convicts Are Good Students

A convict who was admitted to the Prince Albert prison some months ago could not read or write. At the end of his first year his education had progressed sufficiently for him to pass Grade IV standing. There were 24 prisoners started who could not read or write English. Seven passed their Grade III exams, six their Grade II, eight their Grade I, and several others were released during the year. Three men wrote Grade VIII exams and two of them passed, one with honors.

Every Home Needs Minard's Liniment.

Largest Concrete Slab

The largest concrete slab in the world has just been made to form the roof of a Masonic temple. The slab is 72 feet 9 inches wide, 110 feet long and 14 feet 9 inches deep. The supporting columns are 40 feet high.

## HERCULES

PERMANENT BUILDING PAPER

Between the Brick and the Plaster

Concealed, unthought of, the space between brick and plaster spells health and comfort—or the opposite—to the occupants of any home.

In homes where Hercules Permanent Building Paper is behind the outer walls comfort and health are assured. Hercules has been rigidly tested and has proven wind proof and damp proof. Examine Hercules carefully. Prove its qualities for yourself. Ask for samples of the three grades—S, XX, XXX.

Appleford Paper Products

HAMILTON, CANADA

## URGE WHOLESALE SOCIETY TO COVER ALL OF CANADA

Lloydminster, Sask.—By a unanimous vote of the congress of the Co-operative Union of Canada in session here, went on record as being of the opinion that the time had arrived for the establishment of a wholesale society covering the whole of Canada. This is set out in a resolution passed which further urged co-operative wholesale societies to attach an official to their Montreal and Winnipeg depots who will assist in the development of the movement in Canada.

Another resolution was approved, providing for the appointment of a committee to investigate the practicability from the view point of economics, of a Canada-wide wholesale society, an organization for the three prairie provinces only, as well as other factors having a direct bearing on the whole question of consumers' co-operation.

All co-operative marketing organizations throughout the Dominion will be issued a definite invitation to affiliate with the Co-operative Union of Canada. The importance of having the Wheat Pools affiliated with the Union was especially emphasized. While the desirability of having all co-operative organizations inked up was stressed by different speakers on the subject, it also developed that the annual membership fee of affiliated bodies would help to solve the financial difficulties of the central office.

The resolution as passed follows: "That the appeal be made to the societies that was made last year in order to increase the efficiency of the Union, and that the various co-operative marketing organizations be invited to affiliate with the Union."

One delegate put a motion suggesting that the fee of the wheat pools be placed at one cent per member. This motion however, was never put. One fraternal delegate representing the U.F.C., contended that it appeared that the invitation to the pools affiliate was for the express purpose of financing the Union.

The only co-operative organization now holding membership in the Union is the United Grain Growers. It was stated by Secretary George Keen as a result of a question asked by J. H. Weson, a director of Saskatchewan Wheat Pool, Mr. Weson in reply to a question asked, said he did not think that the fact that the U.G.G. had membership in the Union could be considered an obstacle to the Pools becoming affiliated. He did not, however, give any indication that the pools would join.

A resolution asking enactment of legislation providing administrative machinery to insure furnishing annually, financial and business statistics of co-operative societies in their respective provinces was approved by the congress.

## World's Dairy Congress Opens

Forty-Five Countries Represented At Conference in London  
London.—Sixteen hundred delegates, representing 45 countries, assembled in London for the World's Dairy Congress under the auspices of the International Federation, whose patron is the King.

Lord Desborough, president of the British Imperial Council of Commerce, presided. Hon. W. R. Motherwell, Canadian Minister of Agriculture, is representing the Dominion, while the delegates also include Lord Lascelles.

The program is twofold, comprising presentation of technical and scientific papers, etc., and the visits to the dairying centres of England and Scotland.

### Celebrates Anniversary

London.—The Duke of Connaught, former Governor-General of Canada, celebrated the sixtieth anniversary of his entry into the army by entertaining the members of the army council. The Duke, who recently observed his 78th birthday, enjoys wonderful health and fulfills a constant series of public and social engagements, although he has eliminated evening engagements.

### Receives Promotion

Winnipeg.—Robert Nelson Munroe, assistant division commissioner of immigration for Western Canada, has been promoted to a post in the Dominion office at Ottawa, according to word received.

W. N. U. 1740

## Wireworms Damage Saskatchewan Crops

Report Shows Activity Was Unusually Severe This Spring

Regina.—The greatest damage done to Saskatchewan crops this year is by wireworms, according to the recently issued report of the Dominion Entomological Laboratory, Saskatoon, on insect conditions. Much of the damage attributed to cutworms is in reality due to wireworms, it is stated. "Wireworm damage appears to have been unusually severe this spring due to the prevailing dry weather, the use of much unreliable seed grain and the fact that moisture was sufficiently high to enable the wireworms to keep working on much of the seed and particularly the lower part of the stem," says the report. "A certain degree of recovery has been noted as a result of the recent rains, which, however, may tend to lengthen the period of wireworm activity." The forest tent caterpillar infestation now includes an area in the Lloydminster-Malden District and the American tent caterpillar is unusually abundant in Western Saskatchewan.

## Wrong Man Executed

Tragic Miscarriage Of Justice Reported From Germany

Berlin.—"We therefore have no doubt that this unfortunate man was condemned to death and executed for a murder of which he was completely innocent."

This is the sensational statement with which the Mecklenburg-Strasse newspaper confesses to a shocked public a miscarriage of justice, which is described by Berlin newspapers as the most terrible in German history within the last 50 years.

The announcement was accompanied by the dramatic disclosure that four men on whose evidence the prisoner had been condemned have been arrested and have confessed that they themselves committed the crime for which this innocent man had suffered death.

## Drowned When Car Plunges Into River

Accident Happened When Driver Took Wrong Turn In Fog

Charlottetown, P.E.I.—Three young people, all natives of Elliotville, P.E.I., were drowned, and two others narrowly escaped a similar fate, when a touring car took a wrong turn in the fog, and plunged into the river, at Southport recently. The deceased and survivors were all brothers and sisters.

George Walsh had driven the car here from New York, and took his brother and sisters out motoring, last night. They lost their sense of direction in the thick fog, and making a wrong turn, plunged over a wharf, into the river.

## Search For Lost Continent

Expedition Has Left New York For the Azores

New York.—An expedition in search of traces of the supposedly "lost continent" of Atlantis has sailed for the Azores.

The expedition's ship, named the Atlantis, was designed by Columbus O'Donnell Iselin, 2nd, of New York, captain of the expedition, and is equipped with machinery invented by Iselin, which is expected to dredge the ocean bottom at a depth of three miles.

### All Murders Are Solved

London.—Twenty-seven murders were committed in London last year, all of which were solved, according to a report by the Police Commissioner. Twelve persons were charged and ten murderers committed suicide, while one died in an asylum. The value of property stolen was \$2,821,000. Property recovered amounted to \$650,000.

### Jews Promise Three Millions

London.—The Jews of the United States were pledged to raise annually a minimum of \$3,000,000 to make up for the next five years the annual budget for the rebuilding of Palestine as a Jewish national home in accordance with the terms of the mandate of the League of Nations entrusted to Great Britain.

### May Try Westward Crossing

Paris.—Another Westward crossing of the Atlantic by aeroplane may be attempted early in June. The trans-Atlantic aeroplane of Maurice Drouhin and Joseph Lebriz should be ready before July 4. This flight will be a commercial venture. Lebriz said in a speech at Lyons.

## Lord Plumer Vacating Post In Palestine

Has Held Position As Commissioner For Three Years

London.—Field Marshal Lord Plumer will shortly vacate the high commissioner of Palestine, which he has held since 1925. The Daily Express, in an article from its Jerusalem correspondent, says that the retirement will be brought about by Lord Plumer's differences with the British colonial office over the division of the cost of the Trans-Jordanian force as between the British Exchequer and Palestine, Palestine having already a budget deficiency of \$5,000,000.

Lord Plumer commanded the second army during some of the most important operations of the Belgian front in the war, in some of which the Canadian forces took part. He was specially mentioned for good work in connection with railway and forestry battalions. Lord Plumer, who is 71 years old, as a matter of fact, had Canadians constantly with him during the war and he also commanded men from the Dominions in the South African war.

## RESEARCH WORK IN CANADA TO RECEIVE IMPETUS

Ottawa.—Industrial and scientific research work in Canada will receive an impetus as a result of a visit made to Washington by Hon. James Malcolm, minister of trade and commerce, and Dr. Henry Marshall Tory, president of the national research council of Canada, who have returned to Ottawa.

Mr. Malcolm emphasized the fact that it is not the intention of the federal government to duplicate what is being done in the universities or provincial government laboratories in Canada, but rather to secure co-operation and eliminate overlapping. The national research council will assign Nova Scotia problems to the scientists of that province and to the experts of other provinces will be given the problems peculiar to their particular district. Financial aid will be given to scientists working in the various universities.

Plans for the new Canadian laboratories to be established on a ten acre site at the Dominion Experimental Farm, at Ottawa, are now in course of preparation and the government is confident the national research council, working in conjunction with the provinces and the universities, will accomplish notable work in connection with the economic development of Canada.

Plans for the new Canadian laboratories to be established on a ten acre site at the Dominion Experimental Farm, at Ottawa, are now in course of preparation and the government is confident the national research council, working in conjunction with the provinces and the universities, will accomplish notable work in connection with the economic development of Canada.

## LAKE DROPPED TWO INCHES

An excellent official opening of the western lakes and rivers was made this spring when several guests of the Banff Springs Hotel commanded a big motor bus, for the five-mile journey to Lake Minnewanka where several good catches were made.

The best sport fell to G. Andrews, of Banff, who captured a thirty-pound lake trout after a long struggle. He practically swears that the water dropped two inches when the trout had been landed.

## PLANS SPEAKING TOUR

Hon. R. B. Bennett, leader of the Federal Conservative Party, who is planning an extensive speaking tour of the dominion. This picture was taken just at the end of the session.

## Imitation Strike At Antwerp Made Real

Dock Workers Turned Joke Into Real Thing

Antwerp, Belgium.—An imitation strike turned out to be a real one with 11,000 dock workers calling off work in the harbor of Antwerp and refusing to listen to the plea of the shippers to return to their jobs. The affair started out as a joke.

Two Communists bicycled around the harbor, telling the surprised dockers that the union had declared a strike to get a raise of 10 francs (40 cents) a day. The union officials immediately decided to make the strike a real thing.

## Refuses a Peerage

Retiring Speaker Of British House Of Commons Does Not Desire Title

London.—Right Hon. J. R. Whitley, who retired last week from the speakership of the House of Commons, has intimated to the government that for personal reasons he does not desire to accept the peerage which it is customary to confer upon speakers on their retirement.

His refusal breaks a precedent which has been maintained for more than 120 years. Out of ten speakers of the House of Commons who relinquished office since 1802, seven have been created viscounts.

## "Big Tim" Murphy Slain

Assaults Use Machine Gun Method To Finish Gang Leader

Chicago.—"Big Tim" Murphy, Chicago labor leader, was shot and killed at his home at 2545 Morse Avenue in the exclusive Rogers Park district, by assassins who attacked him with machine guns.

An automobile parked on a side street a few hundred yards away threw its glare of lamps on the labor leader as he stepped from the basement doorway, his silhouette reflected by the basement lights.

In response to a call, "Who is there?" Big Tim was answered by the rat-a-tat-tat of a machine gun.

He fell into the area-way, his brother-in-law grabbing his body and dragging it into the bungalow dining room.

Mrs. Murphy returned home as the brother-in-law, Harry Diggs, brought her husband's body into the room. The former state representative and labor leader appeared to be in the direct line of fire from the machine guns, as Diggs escaped injury. Diggs said he saw "four or five men in a big automobile."

A neighbor said he at first thought the firing was some kind of a premature Fourth of July celebration until he learned that Big Tim was shot.

## May Merge Wireless and Cable Interests

Report Of Pacific Cable Conference Is Awaited

London.—The Evening Standard said that it understood an announcement was expected immediately to the effect that the government would approve a merger of wireless and cable interests. Consequently, Marconi stock rose a dollar a share on the stock exchange, and shares of Eastern Telegraphs were also active.

Pending report of the Pacific Cable Conference which has been meeting in London for some time, rumors have been spread of a huge merger of existing cable and wireless company to take over from the various governments of the Empire the present system of Imperial communications. Canada is interested as a participant in the cable system, and the revenue from which has in recent years been unsatisfactory.

## INFLUENCE OF WHEAT POOL ON WORLD MARKETS

Edmonton.—Tales of the success of producer co-operative livestock associations in the United States were unfolded here by C. G. Randall, of the United States Department of Agriculture's division of co-operative marketing, Washington.

"Bigger and better livestock co-operation" was the topic of Mr. Randall. He outlined the progress of farmer co-operatives in the republic, stating that their turnover last year exceeded two and a half billions.

Mr. Randall gave six reasons for success: guide posts to new standards of efficiency on the part of co-operatives; capable and efficient managers and employees; able and working board of directors; well informed active and supporting membership; proper financing and facilities for doing business; volume of livestock sufficient for economic operation; working program, embracing perhaps a research department.

"The greater control of our product, the greater control of our price," was the axiom laid down by George McIvor, general sales manager, Canadian Wheat Pools, in an address on "Functions of a Central Selling Agency." He expressed the desire to see every farmer in the West a pool member and was of the opinion that if the pool controlled 75 per cent. of the Canadian wheat crop (it now has 55 per cent.) it would virtually be able to control the Canadian price, having regard to world markets.

He remarked that the total of wheat traded upon the world markets was 500,000,000 bushels and when the Canadian pools handled 220,000,000 bushels, it could be readily seen what influence it already has on the world market.

"Some problems of management" were dealt with by E. B. Ramsey, of Winnipeg, manager of the Canadian Wheat Pool.

"There is no trick of management that can make up for a badly informed and uneducated membership," said Mr. Ramsey. He added that when a commercial concern failed, it was soon forgotten, while every co-operative that failed struck a blow at world co-operation.

## BRITISH LABOR PARTY OPPOSES LARGE PENSION

London.—The customary pension of \$20,000 annually for retired speakers of the House of Commons was attacked in the House by the Labor Party, when Premier Stanley Baldwin moved a resolution granting the annuity to Rt. Hon. J. H. Whitley.

The official Labor Party amendment moved by Rt. Hon. J. H. Clynes would have made the pension \$5,000, but it was defeated by a vote of 224 against 103.

The resolution favoring the customary pension was then passed.

Mrs. Clynes emphasized that the Labor amendment was not any attempt to minimize the value of Hon. Whitley's services as a speaker. He thought there existed a real case for revision of the emoluments attached to the speakership, in view of the heavy expenses in connection with the office. He proposed, however, that the pension of \$20,000 was unjustifiable.

Rt. Hon. Ian MacPherson on behalf of the Liberals supported the amount of the pension which he considered might be regarded as "deferred salary."

After a few speeches by Labor members the premier intervened and appealed for an early decision without further discussion. He fully accepted the fact that reduction was moved on principle, but pointed out that the speaker, like the premier, was absolutely debarred from entering any business or seeking his own fortune.

The value of the pension today was much smaller than formerly, he added.

Jack Jones, Labor member from Silverton, promptly offered to retire on pension of even \$5,000 immediately.

## Working For Disarmament

League Of Nations Has Made No Progress This Year

Geneva.—A last effort to accomplish something tangible toward disarmament before the League of Nations' annual assembly convenes in September has been begun by the League's security and arbitration committee.

No secret was made of the committee's belief that 1923, which was to be a banner year in disarmament accomplishment, has developed nothing to date.

The committee hoped to draft model security treaties for submission to the assembly as a basis for eventual disarmament treaties.

It had been admitted that a group of European nations will not disarm themselves until such security treaties have been effected—guaranteeing them against possibility of attack.

As a result six model treaties of various sorts were drafted. The commission at its present meeting hopes to draft model treaties in their final form and submit them to the League for approval and action.

## To Consider Kellogg Note

Japan Approves Of Latest Proposal To Outlaw War

Tokio.—The foreign office spokesman says that Japan was in complete accord with the latest proposal of Frank B. Kellogg, United States Secretary of State, for treaty to outlaw war. The cabinet was expected to meet soon, to consider the Kellogg draft, after which a reply would be sent. The spokesman said the government believed the proposed treaty did more to ensure the peace of the world than any similar document in history.

### Registration Cancelled

Panama.—Treasury officials have announced that the registration of all ships flying the Panamanian flag which were found engaged in smuggling liquor or contraband into the U.S. had been cancelled. The ships affected were the Federal Ship of Vancouver, B.C., which was seized more than a year ago by prohibition authorities on the West Coast of the U.S. and later released by court order, and the Chama and the Hakas.

### Ambitious Project Planned

Regina, Sask.—According to a news despatch carried by a local newspaper, a move is being made at Lebbridge, Alta., to pipe gas from the natural field in Alberta to Moose Jaw, Regina, Brandon and Winnipeg. No names are divulged, but it is alleged that a bond issue will be floated in New York to obtain the necessary financial backing.

The marriage of Miss Margaret Finn, formerly of the Lethbridge teaching staff and second daughter of Mr. and Mrs. William Finn, Lethbridge, to Mr. Clarence Gugen, of the C.P.R., took place at Lethbridge on Saturday last. The young couple left that evening for Montreal, from which point they will sail for a three months tour of the British Isles and the continent. Returning, they will make their home in Lethbridge.

A large audience attended the evening service at the United church on Sunday last to hear a very able sermon and lecture by Rev. H. N. Kunkle, of Toronto, Canadian secretary of the interdenominational mission to lepers. Both discourses were exceedingly interesting and enjoyed, the lecture, particularly, which was illustrated by lantern slides. Mr. Kunkle was accompanied by his wife, who sang a solo during the service.

## Local and General Items

The Drumbeller tax rate for 1928 has been set at 48 mills.

The Elks at St. Paul de Metis will build a hall, costing in the neighborhood of \$20,000.

Mr. George Sangster left on Tuesday morning for Medicine Hat, where he will in future make his home.

Mr. and Mrs. Charles Harrison are rejoicing over the advent of a baby boy and heir, born on the morning of July 1st.

Mr. and Mrs. O. E. S. Whitehead, of Coleman, recently visited with Mr. and Mrs. Ernie W. Whitehead at Strathmore.

One of our exchanges, through a typographical error, refers to Miss Farhart as a flying ass, instead of a flying ace.

Mrs. A. B. Steeves leaves tomorrow (Saturday) for Albion, N.Y., where she will visit her father, Simon Dragor, formerly of Fernie—Ferne Free Press.

The regular monthly competition for ladies of the golf club will be held Saturday, July 7th. Members will please remember this date as no further notice will be given.

The pupils of Mr. W. J. Harris, violin teacher, will have their examinations on July 10th, which will include pupils from Passburg to Michel. The examiner will be Mr. P. B. Kennedy, of Toronto.

In a war waged in the Hanna, Alberta, district against crows, 784 crows and 240000 eggs were accounted for. Almost as many were destroyed by Drumbeller sportsmen in the same period.

The marriage of Magdelene (Lena), only daughter of Mr. and Mrs. Joseph Raskevich, of Bellevue, to Mr. J. Wilfred Eggleston, of Toronto, former vice-principal of the Bellevue high and public schools, took place at Bellevue on June 28th, the ceremony being performed by Rev. R. G. Taylor, of Hillcrest. The young couple will make their home in Toronto.

Last week the town was visited by another one of those high-pressure salesmen, representing a company who furnished money at a very low percentage for parties who wished to build houses and business places in the town. First of all, the applicant had to part with \$43.00 and in six weeks time the amount asked would be forthcoming. The high rates of six pending applications here, but it was fortunate that they all held over until an investigation was made, which proved that the company were more or less of a fake. The country is full of such schemes and there is all the more reason why everyone of us should be on our guard against these frauds—Stavely Advertiser.

LOST—Firestone Tire, 32 x 6, and cover, reward \$5. B. Bert, Coleman Hotel.

### IN MEMORIAM

In loving memory of Johnny Bovio, who was drowned at Lee Lake on July 8th, 1927.

"The blow was great, the shock severe,  
We little knew the end so near,  
And only those who have lost can tell,  
The pain of parting without farewell."

Now gone is the face we loved so dear,  
Silent the voice we loved to hear,  
Loving and kind in all his ways,  
Clever and just to the end of his days.

Ever remembered by his loving father, mother and sisters.

Coleman Elks will hold their annual carnival on July 21, 23 and 24.

Mrs. Robert Gray and children left by motor last week for a vacation at Kootenay Lakes.

W. Robbins was down from Vulcan to spend the Dominion Day holiday with his parents.

Misses Irene and Mary Sartoris are home from Calgary to spend their vacation with their parents.

Twenty years ago, the tax rate at Nanton was 7 1/2 mills for town purposes and 8 1/2 mills for school.

Mrs. E. W. Christie, of Bellevue, has returned from a long stay in Lethbridge, much improved in health.

The province of Saskatchewan is profiting to the extent of about \$200,000 a year by having all police work done by the R.C.M.P.

Russia has only one automobile to every 6000 inhabitants, and an exchange remarks: "Oh, Henry, where have you been all their lives?"

H. T. Halliwell, editor of the Coleman Journal, attended the same convention of the Canadian Weekly Press Association at Edmonton this week.

We notice in one of our exchanges that policemen are going to be vaccinated. Well, that seems all right, but it's very seldom they catch anything.

A. D. Campbell, of Edmonton, grand master of the Grand Lodge of Alberta, I.O.O.F., recently underwent an operation in an Edmonton hospital, and at last reports is doing well.

Formal announcement of details of a merger which will bring together the Pierce Arrow Motor Car Company and the Studebaker Corporation was made on June 29th.

We thank Mr. J. D. Matheson, of Macleod, for concurring with us in encouraging sportsmen to use their bagpipes at a depth of not less than fifty feet under water.

A large crowd enjoyed the music of the Blaimore orchestra last Saturday night at the Pavilion. Dances from the crowd and far were numbered in the record—Waterton Lakes correspondence in Cardston News.

Mrs. Warren Ayres was down from Clearholm last early part of the week, accompanied by her sister, Miss Aeneath Palmer. Mrs. Ayres is moving her household effects to Turnbull Valley, where Warren has secured a permanent position.

Miss Tena McLaren, of Ridgeway, Ontario, is visiting with her niece, Mrs. L. B. Hetherington, at Cowley. After some time spent here, she will be visiting relatives at coast points, including Vancouver, Victoria, Dewdney and Chilliwack, B.C.

Mr. Jesse Griffith, brother of Jack Griffith, of 58th Street, Coleman, arrived at Coleman last week from Cardiff, Wales, making the trip in the remarkably quick time of ten days and a half. It is quite a number of years since the brothers have met.

Mr. E. D. Heathcote, of Fernie, president of the East Kootenay Mine Society Association, and Mr. J. T. Pucky, superintendent of the Mine Rescue Station at Fernie, were in Blaimore on Dominion Day and acted as judges for the first Aid competitions.

Miss Madeleine Chardon left Saturday night for Victoria, via Calgary, and will be away about eight weeks. Before leaving, a recital by her piano pupils was rendered at her home, at which a number of her friends and friends of the children attended.

The local mine was beset with a series of accidents yesterday. Mr. Evan Moran was injured when he received the force of a shot about the head and face: a minor named Barney Louhi had the misfortune to break a leg, while earlier in the day Mr. A. J. Smith was struck in the eye with flying coal.

Miss Flora Warner, who since the Christmas holidays has been teaching at the Norton school near Medicine Hat, returned Monday morning to visit for a couple of days with her parents. Mr. and Mrs. J. E. Warner. Miss Warner left on Tuesday night for Calgary, to be joined there by Miss Erna Strone, teacher at Weirwright, and continued on to spend the balance of her summer vacation at the Pacific coast, the guest of Miss Strong, while on a visit to her parents at Portland, Oregon.

On Saturday, June 30th, a pretty wedding was solemnized in Bellevue United church at 2 p.m. Miss Margaret Mitchell, just arrived from England on Tuesday, was united in the bonds of holy matrimony to Mr. Adanson Raffle, who came to Bellevue some months ago from the same place. Many friends were gathered to witness the ceremony. After being showered with confetti and good wishes, the happy couple, along with the invited guests, went to the home of Mr. and Mrs. Long, where the wedding dinner was served.

During the electric storm on Tuesday afternoon, the residence of Mike Sekelle, at Passburg, was hit by lightning about 2:30. The bolt struck the chimney, ripping a carpet and setting a small fire to some clothing within the house. Mr. and Mrs. Sekelle, together with their five children and a son-in-law, were in the kitchen at the time and all received a severe shock. Mr. Sekelle fainted the worst, the shock slightly affecting one of his legs.
